

Model 3000 / Access 4000 Computer Interface Cable. P/N: 993025

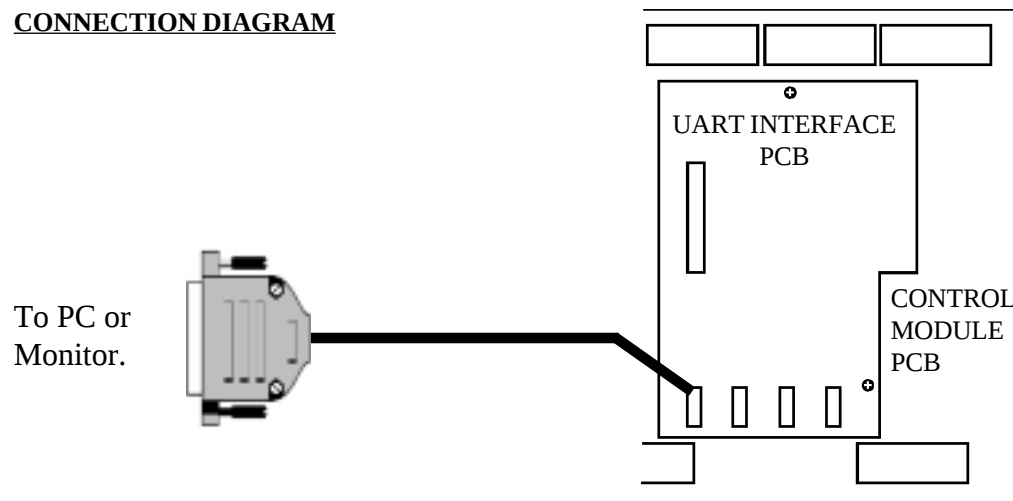

The Computer Interface cable, allows for a PC or Monitor to be connected to a Model 3000 / Access 4000 Control Module.

Before the cable can be used, one of the following Model 3000 UART board options must be fitted to the Control Module: 993065 (Model 3000 Single Port UART), 993066 (Model 3000 Dual Port UART), or 993068 (Model 3000 Four Port UART). If fitting the UART board follow the installation instructions carefully, ensuring that the Control Module is powered down and battery disconnected before the UART is fitted.

Installation:

1. Connect the 10 way plug onto one of the Headers on the UART board, checking for correct alignment. Orientation of header key is indicated on the board.
2. Connect the 9 Way D connector to a Serial Port on the Laptop Computer.
3. Program a Comms Task for the required format (PC Direct, ACCEPT or Monitor), select the appropriate Port (1 to 4), and a baud rate of 9600 or lower.
