

Product Information

Date: May 26th, 2015

Product: IPRS7 IP/GPRS PC Receiver Software

Subject: New firmware version 4.1.6 release

Downloads: To download the IPRS7 firmware V4.1.6, [*click here](#)

**requires user login and password to download*

New Features: **Supports Delay Disarm**

The IPRS7 now supports the delay disarm feature which allows installers to program an area option that delays disarming for up to 60 minutes. Once a user code is entered to disarm, the IPRS7 events list will display “Disarm Delay” as well as the “Area” and “User”.

This feature requires EVO192 V3.20
