Terms and conditions

Payment terms

- 1.1 Invoices are payable immediately upon receipt
- 1.2 Unpaid invoices will result in the suspension of services until remittance is received.
- 1.3 Devices are charged according to the supplied rate plan sheet.
- 1.4 Pricing is quoted 'per month' and charged on a quarterly basis.
- 1.5 Charges for a 'new connection' will be calculated from the day a dealer user 'adds' the device to the dealer portal.
- 1.6 A 'new connection' will be charged pro-rata in arrears plus a quarter in advance at the next billing cycle, all future charges after the first billing cycle will be invoiced a quarter in advance.
- 1.7 A complete statement containing the total number of devices and their charges will be emailed to you along with your invoice.
- 1.8 After a cancellation has been completed the device will continue to be active for the remainder of the quarter.
- 1.9 Inner Range will not provide credits for the remaining time after a device is cancelled.
- 1.10 The dealer is responsible for cancelling subscription plans by removing them from the device using the dealer portal.
- 1.11 Credits will not be given to a dealer if an unused device is not properly cancelled through the dealer portal by a dealer user.
- 1.12 The dealer is responsible to contact support if a cancellation is not successful.
- 1.13 Inner Range reserve the right to change the monthly rates with minimum prior warning of 3 months.
2. Support
- 2.1 Business hours support will be available at no additional charge for every 'online' device.

SkyCommand Dealer Portal

Dealer access to the SkyCommand web portal allows you to view, manage and activate your T4000 devices in one location.

Use the portal to unlock the potential of your T4000s, configure them for push notifications, add and remove users, access diagnostics and event history.

Once the sites are setup your clients can control them from the device of their choice, using the Android or iOS app that matches their hardware.

SkyCommand End User App

SkyCommand

The SkyCommand app combined with the T4000 hardware delivers alarm notifications and the freedom to control security areas, lights, heating/cooling and door access. Utilising T4000 high-level integration to an Integrity, Inception or Concept system, SkyCommand provides powerful control over door access, security and automation. Third party alarm systems can also be controlled using the out-put on a T4000 via a key-switch input on any third party alarm panel.

- Instant notifications for alarm events to your mobile phone*
- Arm and disarm your security system remotely
- Supports multiple sites and security areas
- Remotely turn on and off locks and appliances
- Create favorites lists for quick access to items
- Personalise items with images
- Notification and event history
- PIN or Biometric App entry and lock

*Push Notification is a subscription service. Contact Inner Range for a SkyCommand Dealer form and pricing.

SkyCommand

T4000 PUSH NOTIFICATION PRICING

Professionally Monitored T4000 and legacy Multipath-IP devices

The SkyCommand push notification subscription can be added to any T4000 whether it is professionally monitored or is installed as a stand-alone device.

Connection Paths	Description	Price per Month Ex GST
As per the selected T4000 Monitoring plan	Receive push notifications for events from pre-existing and new Multipath-IP devices. Enable control of areas and auxiliaries from the SkyCommand app.	\$6.00 per month

Stand-Alone T4000

Connection Paths	Description	Price per Month Ex GST
Ethernet Only	Receive push notifications for events from stand-alone T4000s. Enable control of areas and auxiliaries from the SkyCommand app.	\$6.00 per month
Single SIM and Ethernet		\$8.00 per month
Dual SIM and Ethernet		\$10.00 per month

T4000 Router

The T4000 is now capable of routing IP data over wireless cellular networks, allowing system integrators and end clients to remotely manage their security systems on sites that do not have local hardwired internet connection.

The routing capabilities of the T4000 are basic and have been designed specifically for use with Inner Range security panels. Simply connect your Integrati or Inception controller to the T4000 using a straight through Ethernet cable and then sign up for a data subscription via the SkyCommand website (<https://skycommand.com.au>). The T4000 will route the panels SkyTunnel connection to the Inner Range SkyTunnel server, allowing any user with sufficient security permissions and an internet connection the ability to connect to the panel remotely.

T4000 Router is also compatible with Concept systems that have an Ethernet UART fitted. Since the Concept system does not support SkyTunnel, the Insight server will need to be accessible via a public IP address.

Please Note: The T4000 Router is not recommended to be used for CCTV or live video transmission.

T4000 Router Pricing

Data Plans	Recommend Usage	Price per Month Ex GST
40MB	Ideal for Inception systems requiring web access for basic control, simple user management and occasional maintenance.	\$12.00 per month
500MB	Ideal for Inception systems requiring frequent web access for user management and maintenance. Suitable for small Integrati systems requiring remote access for basic control, simple user management and occasional maintenance.	\$20.00 per month
1GB	Ideal for small Integrati systems requiring frequent remote access for control, user management and maintenance.	\$29.00 per month
2GB	Suitable for larger Integrati systems with regular access for control, user management and maintenance.	\$42.00 per month

Please Note: Integrati systems can use excessive data and may require some settings to be changed prior to enabling the T4000 Router. Please refer to the T4000 Router - Setup Guide for methods to reduce the data usage of an Integrati system.
