'Garage Sale. Household furniture and effects. Owners going overseas.' It's not original. It's an ad that appears many times a day in newspapers all over N.Z. The population is shrinking and opportunity and initiative, in conventional terms, barely exist but one business is booming. That business is the N.Z. government. Our happy band of clayton private enterprisers are now gouging 8 times the taxation they took from us a decade ago. We won't debate the validity of the government's needs but when the government takes from us \$1 in tax, spends 60 cents on administration and offers us 40 cents back in some service or other it takes away from us the power to use that \$1 for what we, and our families, really need. This has the debilitating effect of making us dependent on the state rather than self dependent and the government is actually buying our dependence with our own money. This loss of individual self reliance is a root cause of our economic and social malaise. You, like us, have little scope in bringing change on a national level but we can bring change to our own community by simply enjoying life and doing positive things. OUTLOOK exists to record and celebrate these positive things. Our governments may beat us economically but they can't beat us as healthy happy people even if the SIS has had a 47% increase in its budget this year. So help yourself, help our community, help our country and help our government. Get up and do something, then call us so we can photograph it and show everyone. Now if you have waded through all this, have a look at the pictures.

COVER . . . Bert Tonks with his 1913 Daimler. Another fine Bob Kenworthy photo.

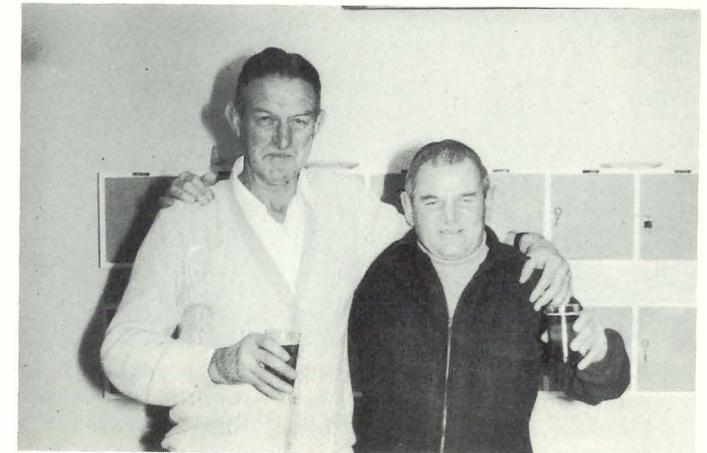

ABOVE : Taitoko Tawhiri welcomes the ministerial party onto the Putiki Marae as a prelude to opening the new Kaumatua flats in Putiki and Aramoho. Built by Maori Affairs, the flats are part of an ongoing programme and while providing needed dwellings they also stimulate marae activity and generation links as elders can now live close to the Marae.

ABOVE : Mrs Mohi greets Rei Bailey while Tau Paranihi looks on. **LEFT :** A welcome for Ben Couch from James Takarangi. Behind is David Taumata.

ABOVE : Part of the crowd at the opening gather outside some of the flats completed last year.

"An art work is, most often, a response to an issue or problem that confronts the artist, but students often suffer from too much comfort and security to arouse an artistic concern. They tend to explore the processes of art rather than the reasons for it." These words from the cover notes of this year's Robertson Award catalogue and to help students through this problem they were given the specific theme of 'Studies in Motion.' The students, aged between 12-19, responded handsomely with 307 entries.
